

**CEF Success Story, Karawanken: the largest cross-border infrastructure project between Slovenia and Austria.**

Karawanken is the largest cross-border infrastructure project between Slovenia and Austria. It aims to reduce the tunnel safety risk in compliance with the EU Road Tunnel Safety Directive. For the design of the tunnel both parties use an innovative design method based on a Building Information Model (BIM) which has been showcased at the exhibition of the TEN-T Days 2018. Please follow this [link](#) to know more about the project!
